### **LOT 5 — Mini Brand Discovery Programme**

Value £5,000 – This shortened programme is designed to help founders and CEOs understand and maximise their full brand potential.

You can have the most innovative product in the world, but if you can't clearly communicate its value to investors, employees and the marketplace in a way that helps them 'get it' you are in for an uphill struggle. Brand building is as important to early business success as product development and raising money.

You'll find this invaluable especially if you are altering strategic direction; have a confusing or non-existent image; want to enter new markets; need to refocus your messaging and communication strategies around your audience; thinking of changing name; seeking new rounds of venture funding or investing in a new website.

Our programme includes a founder interview plus several key customer /audience perception interviews; competitor and desk research. At its conclusion, you will receive an Executive Summary Report that details key insights and makes strategic recommendations to guide your future marketing initiatives.

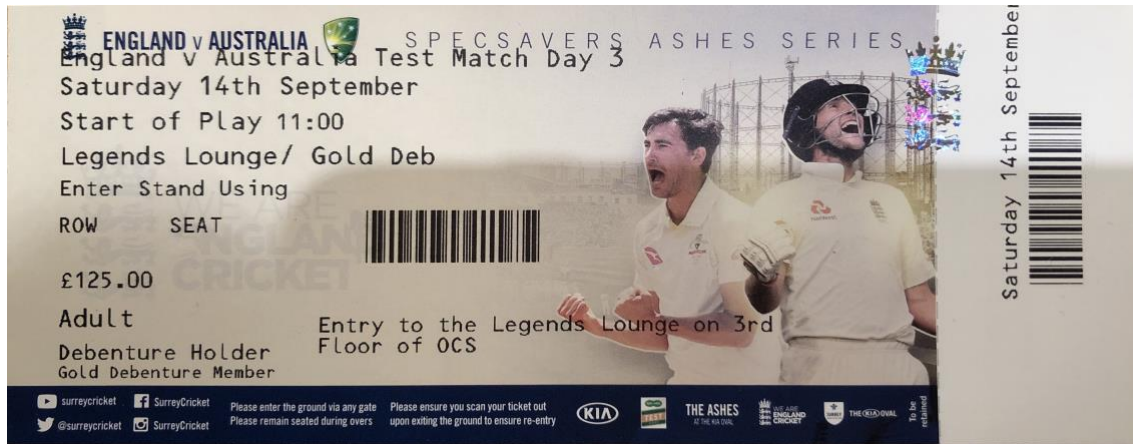

The report will provide insight on the following:

- \* Brand overview
- \* Competition – frame of reference
- \* Brand positioning criteria
- \* Brand core purpose, vision and values
- \* Brand personality – reflects type of people customers want to deal with
- \* Target customer segment description
- \* Behavioural drivers – what customers value most
- \* Desired target customer associations with the brand
- \* Brand architecture
- \* Strategic imperatives and next steps
